ARSLAN

# SSD - STRATEGIC SOLUTIONS DIVISION

At Arslan we know that global corporations as well as smaller domestic companies face many issues on a daily basis that can range from staff fraud to corporate takeovers. We have formed our Strategic Solutions Division (SSD) to work with organisations and Institutes to address these internal and external elements. We can advise on control measures that act as a first line of defence or carry out due diligence in regard to individuals or companies.

We will support your company and work closely with your client management in developing and implementing appropriate systems and strategies to address the issues. We can conduct operational audits and training for your organisation so that you are better equipped to deal with any future breaches.

## OUR BENEFITS

- Corporate Investigations
- Financial Investigations
- Fraud Investigations
- Due Diligence Services
- Risk Assessments
- Crisis Consulting Services
