

RESIDENTIAL PROTECTION

ARSLAN

RESIDENTIAL PROTECTION

Our residential security teams (RST) ensure the safety of our clients' families and private homes. Depending on the needs of the client, this can range from a single close protection officer, covering a specific part of the day, to a full team offering round the clock protection. Our role is to provide physical protection, maintain image and reputation and secure the assets belonging to our client.

Our residential security teams ensure the safety of our clients' homes and their families.

To compliment our RST, we provide a holistic service using our systems experts, who are able to design bespoke packages including alarms, safe rooms, perimeter intruder detection and CCTV to supplement and support the RST. We can provide a screening and vetting service to our RST clients. We carry out background and security checks on domestic staff and suppliers of services. We can also provide a cost benchmarking service which has been proven to reduce costs and improve service levels.

OUR BENEFITS

Protection from:

- Physical threat and harm
- Abduction
- Unwanted media coverage
- Absolute confidentiality and discretion
- Sensitive and intelligent officers matched to the requirements of the people in their care
- Provision of secure, executive transportation where required
